

18-port fiber optic patch panel dimensions and weight

Overview

1 U: 465 mm (W) x 238 mm (D) x 44. el Powder coat RAL7035 or RAL9005 6 kg (2U), 4 kg (1U) FTTX applications, Data center and LAN & WAN projects. The patch panels offer a flexible and highly versatile solution for optical splicing and patching. The panel's shallow depth allows it to be installed within the majority of standard racks and wall-mount enclosures. Available with either single mode or multimode connectors to accommodate the specific requirements of your network infrastructure. Constructed from high-quality steel to provide maximum. 1U and 2U versions (12, 24, 36 and 48 port capacity) Smooth and convenient mechanical sliding system Manages small & large quantities of fiber with a high packing density Cable glands to secure the incoming fiber, allows min movement Fiber guide tubes to protect and direct the fibers to the cassettes. FHU series 1U 19" fiber patch panel pre-equipped with either LC or SC connectors to offer an economical, high-density fiber termination solution that doesn't take up much space. Choose from a wide selection of customizable, versatile. The Siemon LightVerse® system includes a range of Fiber Modular Patch Panels, designed to provide users with a flexible solution for deploying fiber optic connectivity in high-density data center and intelligent building environments where fast deployment and simple maintenance is required.
