

Add acrylic to the distribution box

Article Overview

You can add acrylic to a distribution box by cutting a clear acrylic sheet to size and securing it as a protective cover using glue, screws, or corner frames.

Choosing Acrylic

Select a clear acrylic sheet (PMMA) that is durable and lightweight. Acrylic is more impact-resistant than glass and allows full visibility of the components inside the box . Standard thicknesses for protective covers range from 2mm to 5mm depending on the size of the box and the level of protection needed.

Cutting and Preparing Acrylic

- Measure the dimensions of the distribution box carefully, accounting for any overlap or mounting space .
- Use a table saw with a fine-toothed blade or a laser cutter for precise, chip-free edges .
- Remove the protective masking from the areas to be glued or mounted.
- Optional: route the edges to improve the final appearance and ensure a flush fit .

Attaching Acrylic

There are several methods to secure acrylic to a distribution box:

- Glue-in-place: Apply acrylic-specific glue along the edges and hold the sheet in place until it sets. Small air bubbles are normal .
- Screws with corner frames: Use extruded aluminum corner frames or elastomer c...
