

Bahrain offers low-power SFP optical modules

Article Overview

Bahrain now offers low-power SFP and SFP+ optical transceivers for high-speed, cost-effective networking applications.

Overview of SFP Modules

Small Form-factor Pluggable (SFP) modules are compact, hot-pluggable network interface transceivers used for both fiber-optic and copper connections in telecom and data communications . They allow network ports to be equipped with different transceivers as needed, supporting standards like Gigabit Ethernet, Fibre Channel, and PON. SFP+ modules extend this capability to 10 Gbps speeds, while low-power variants are optimized for energy efficiency and cost-effectiveness .

Low-Power SFP Modules in Bahrain

LINK-PP LS-BL55312G-40C

- Data Rate: 2.5 Gbps
- Transmission Distance: 40 km over single-mode fiber (SMF)
- Wavelength: 1550 nm
- Features: DFB laser transmitter, PIN photodiode with TIA, MCU control, SFP MSA compliance, SFF-8472 digital diagnostics
- Power Efficiency: Designed for low power consumption, suitable for 2.5G Ethernet applications...
