

Budget for Enterprise Intelligent Power Distribution Cabinets

Article Overview

Enterprise intelligent power distribution cabinets typically range from \$2,000 to \$15,000 or more depending on size, monitoring, and customization.

Price Ranges and Cost Factors

The cost of an intelligent power distribution cabinet depends on several factors: rated current, number of outgoing circuits, breaker brand, monitoring level, cabinet size, IP rating, ventilation, and customization requirements . For small equipment rooms, a basic cabinet may cost around \$2,000-\$4,000, providing incoming protection and branch breakers. For mission-critical data centers or telecom hubs, high-end cabinets with branch circuit monitoring, touchscreen interfaces, communication modules, and redundant A/B power architecture can range from \$10,000-\$15,000 or more .

Monitoring Levels

- Basic Monitoring: Measures incoming line voltage, current, frequency, power factor, and energy consumption. Suitable for smaller projects .
- Mid-Level Monitoring: Adds branch current measurement to detect overloads or unbalanced loads .
- High-End Monitoring: Detailed branch-level monitoring with current, voltage, energy, switch status, alarms, temperature data, touchscreen display, RS485, Modbus, Ethernet, and remote system integration
