

Cable Tray Production Machinery

Overview

A Cable Tray Roll Forming Machine is a high-performance production line designed to manufacture metal cable trays used for supporting and organizing electrical cables in industrial and commercial buildings. Here is the comprehensive, industry-standard cable tray manufacturing process and step-by-step production flow that guarantees high-performance electrical containment systems. Our production line is equipped with intelligent punching, roll forming and. Our advanced cable tray production line is engineered to provide automated forming, punching, and cutting processes for various types of cable trays, including perforated, ladder, and solid-bottom trays. It forms the sheet into specific shapes and specifications through decoiling, leveling, punching, notching, and roll forming.
