

Cable connection method for concealed electrical box

Overview

Concealed conduit wiring system is a widely used method for electrical wiring installations in residential, commercial, and industrial buildings. It involves the installation of electrical cables within concealed conduits, which are embedded in walls, floors, or ceilings. Expansion coupler shall be utilized at locations where PVC Conduits are crossing construction expansion joints. Connect conduits terminating in switchgear, fuse boards, trunking. The purpose of generating this method statement is to define the procedure for Installation of Electrical Conduit and boxes through guidelines contained herein to ensure that the job execution complies with the requirement where applicable in the project. The wires are installed in 4 steps.
