

Cable tray production location

Article Overview

Cable trays are manufactured in multiple global locations, including Canada, Saudi Arabia, and China, with production facilities tailored to industrial, commercial, and residential applications.

Major Manufacturing Locations

ABB, a leading cable tray manufacturer, operates production facilities in Canada and Saudi Arabia, producing perforated trays, cable ladders, channel trays, and metal framing systems. These facilities combine local manufacturing with distribution networks to meet regional demand efficiently and support large-scale projects . China is another significant hub for cable tray production, particularly for machinery and automated production lines. Companies like Haixing Tianjin provide advanced cable tray production lines capable of forming, punching, and cutting various tray types, serving industrial electrical projects, power plants, and construction industries worldwide .

Production Plant Insights

Metal cable tray manufacturing plants are typically designed to handle steel, aluminum, and stainless steel materials, using processes such as roll forming, welding, and finishing. Facilities are often equipped to produce 10,000–20,000 metric tons annually, supporting applications in power generation, oil & gas, data centers, industrial manufacturing, and transportation infrastructure . These plants emphasize quality control, corrosion resistance, and compliance with international standards (IS, IEC, NEMA)....
