

Cable tray wiring and pricing

Article Overview

Cable tray prices in 2026 range from \$2 to \$50 per meter depending on material, type, and installation complexity.

Material and Type Pricing

- Galvanized Steel: Common and durable, typically \$2-\$25 per meter. Ladder trays are more expensive but support heavy cables, while perforated or wire mesh trays are cheaper and suitable for lighter loads .
- Aluminum: Lightweight and corrosion-resistant, ideal for outdoor or humid environments, costing \$6-\$30 per meter .
- Stainless Steel (SS 304): Highly durable and corrosion-resistant, used in heavy-duty or chemical environments, generally higher than aluminum, often exceeding \$25 per meter .
- FRP (Fiberglass Reinforced Plastic): Resistant to aggressive environments, priced \$10-\$50 per meter depending on size and design .
- Plastic Trays: Budget-friendly, suitable for light loads, generally at the lower end of the price spectrum .

Installation Costs

Installation costs vary based on labor, supports, connectors, and complexity. Skilled labor and regional wage differences can significantly affect the total cost. Open ladder trays are faster to install than conduit or enclosed systems, reducing labor expenses . Accessories like brackets, fittings, and supports add to the overall cost, especially in large-scale projects
