

Complete Guide to Fiber Optic Terminal Box Dimensions

Article Overview

Fiber optic terminal boxes vary in size, capacity, and mounting type, with typical dimensions ranging from compact 116 × 81 × 25 mm units to larger wall or DIN rail enclosures, supporting multiple fiber splices and connectors.

General Features

Fiber optic terminal boxes are designed for splicing, splitting, storage, and management of optical fibers. They provide protection for fiber pigtails and splices, often featuring mechanical sealing, waterproofing, and impact resistance. Common materials include ABS plastic with electrostatic powder coating for durability and fire resistance. Boxes are available for indoor, outdoor, wall-mounted, or DIN rail installation .

Capacity and Connectors

- Splice Capacity: Typically 2-16 fibers depending on the model. For example, the ORM 1 box supports up to 4 splices .
- Connector Types: SC, LC, FC, ST; available in simplex or duplex configurations .
- Adapter Ports: Some boxes include optional adapter plates for flexible connector management .
