

Connecting the light wires to the distribution box

Article Overview

To connect light wires to a distribution box, ensure the main power is off, then connect the phase, neutral, and earth wires to the appropriate terminals via the MCBs and RCCB for safe and reliable operation.

Safety First

Before starting, turn off the main power supply to prevent electric shock. Use insulated tools and wear protective gloves. Verify that the distribution box is properly mounted and that all wires are correctly rated for the load they will carry .

Step-by-Step Connection

- Identify Wires: Typically, the phase (live) wire is brown or red, the neutral wire is blue or black, and the earth wire is green/yellow .
- Connect Main Supply: Attach the incoming phase and neutral wires from the main supply to the input terminals of the main MCB. If an RCCB is used, connect the output of the main MCB to the input of the RCCB .
- Connect Lighting Circuits:...
