

# Current Price of Fiber Optic Communication Lenses

## Article Overview

Fiber optic communication lenses typically range from a few dollars to several hundred dollars per unit, depending on type, precision, and application.

### Price Range

- Standard lensed fibers such as tapered, ball lens, or angle-polished fibers are available at affordable wholesale prices, often starting around \$5-\$50 per unit for bulk orders, with custom specifications potentially increasing the cost .
- High-precision or custom lenses, including aspheric, collimator, or multi-lens arrays, can cost \$50-\$300 or more per piece, depending on material quality, coating, and optical tolerances .
- Ball lensed fibers used for high-efficiency coupling in telecommunications, sensing, or medical applications are priced based on lens diameter, alignment precision, and batch size, with bulk purchases reducing per-unit cost .

### Factors Affecting Cost

- Lens Type: Convex, aspheric, collimator, or ball lenses have different manufacturing complexities, affecting price .
- Material: Lenses made from high-purity silica glass or specialized coatings (e.g., platinum) are more expensive than standard plastic lenses .
- Precision and Tolerances: Sub-micron tip radii, polished surfaces, and high coupling efficiency increase manufacturing costs .
- Customization: OEM or custom lens arrays designed for specific optical systems o...
