

Data Center Active-Active Solution

Overview

The Active-Active Data Center Solution deploys storage resources across two data centers. A single storage system manages the resources of both data centers, and through data replication, copies are distributed across different data centers to ensure strong data consistency. The hospital data center should meet the requirements of 24/7 uninterrupted services, simple and efficient operation, data security and reliability. H3C's sub-brand Aolynk, designed specifically for SMB (small and medium-sized business) in global markets. mo 2020 Dell Technologies Proven Professional Knowledge Sharing 2 The Dell Technologies Proven Professional Certification program validates a wide range of skills and competencies across. Active-Active, as the name implies, means that both sides are active online to provide services, as opposed to the traditional Active-Standby model. Dual data centers simultaneously provide.
