

Distribution box size 570

Article Overview

Distribution box size 570 typically refers to a power distribution block or enclosure with model designation 570, designed for safe and organized electrical distribution.

Overview

A distribution box of size 570 is generally used for consolidating, distributing, and managing electrical power in residential, commercial, or industrial setups. These boxes are designed to meet international safety standards such as UL, CSA, and CE, ensuring proper air and creepage distances for branch and feeder circuits . They are often made from SMC (Sheet Molding Compound) or FRP (Fiber Reinforced Plastic), providing fire retardancy, weatherproofing, and shockproof properties .

Key Specifications

- **Material:** SMC or pultruded FRP, which is rustproof, shockproof, and weatherproof .
- **Electrical Ratings:** Distribution blocks like the 570A model can handle $2 \times 12\text{--}150\text{mm}^2$ and $12 \times 2.5\text{--}25\text{mm}^2$ cable connections, with short-circuit current ratings (SCCR) up to 200 kA when combined with appropriate fuses or MCCBs .
- **Standards Compliance:** UL508A, UL1953, CSA, and CE approved, ensuring safe operation in industrial control panels .
- **Design Features:** Cable entry from bottom or sides, tamper-proof hinges, and easy organization of consumer connections .
- **Mounting Options:** Pole mounting or wall mounting arrangements are available depending on the model and installation requirements .
