

Does the Xiaomi 10 Gigabit Router support fiber optic access

Overview

On the right side, there is a 10G SFP+ fiber interface and a 10G WAN/LAN adaptive network port, which can meet daily 10G network data transmission needs. The fiber interface requires use with an optical module and supports WAN/LAN switching. It can also be used for fiber dial-up. Xiaomi has unveiled its latest router official alongside its new flagship Android smartphones. 5 Gigabit ports for internal lan. 5 gigabit (Gb). The AX10000 can support up to x10 Xiaomi/Redmi Wi-Fi 6 routers in tri-band Mesh networking, realizing seamless roaming of multiple routers, especially suitable for friends with large villas or self-built houses! (Each antenna group contains three high-gain antennas). It is priced at 1,699 yuan (\$238) in China. The BE10000 Pro uses a vertical tower-style design with a matte finish. It measures 242 x 70 x 273 mm and includes seven LED indicators, 12.
