

F2h Optical Power Meter Calibration

Overview

This guide covers when to calibrate, what calibration actually involves, what a legitimate certificate looks like, and how to verify your meter's accuracy between calibrations. Send the meter to a NIST-traceable calibration lab. This application note demystifies how EXFO's IQS-12002 Optical Calibration System can guide. The FHP2 series are full featured palm sized optical power meters designed for use with an optical laser source to perform optical loss measurements on optical fiber cables. The FHP2 series are lightweight and are controlled by microprocessor. Utilizing state-of-the-art SMT in its manufacture. We can calibrate your Fiber Optic Power Meters at two service price levels: ISO9001 or ISO/ IEC 17025 We check the cleanliness of the optical detector. If we find a performance problem with the received instrument, we will let you know. You can also ask for a linearity. CONTENTS PAGE 1 Introduction 2 Warranty 2. Under the situation of laboratory, LANs, WANs and CATV as well as long distance optical network.
