

Good galvanized cable tray prices

Article Overview

Galvanized cable trays typically range from \$20 to \$150 per standard section, depending on type, size, and coating.

Price Overview

The cost of galvanized cable trays varies based on material, design, and finish. Hot-dip galvanized steel trays, commonly used for industrial and commercial installations, are priced according to standard lengths (usually 2.4 meters) and type, such as ladder, perforated, or wire mesh trays . Typical price ranges include:

- Hot-dip galvanized ladder trays: \$25-\$80 per 2.4-meter section
- Perforated galvanized trays: \$30-\$100 per section, offering better ventilation and cable support
- Wire mesh galvanized trays: \$40-\$150 per section, preferred for flexibility and lightweight installations

Factors Affecting Prices

- Material Quality: Higher-grade steel or additional galvanization increases durability and corrosion resistance, raising the price .
- Tray Type: Ladder trays are generally less expensive than wire mesh trays due to simpler construction .
- Coating and Finish: Powder-coated or hot-dip galvanized trays cost more than untreated or painted trays but offer longer lifespan .
- Supplier and Location: Prices vary by manufacturer, distribution costs, and regional demand
