

How much does a fiber optic cable splicing package cost

Article Overview

Fiber optic splicing typically costs \$50–\$150 per fusion splice, with total project costs influenced by labor, equipment, cable type, and site conditions.

Per-Splice Pricing

For most commercial projects, fusion splicing costs range from \$50 to \$150 per splice point, depending on fiber type, access, and project complexity. Large projects with high fiber counts often benefit from volume pricing, which can reduce the per-splice cost significantly. Mechanical splicing is generally cheaper upfront but may result in higher signal loss and is often used for temporary or emergency repairs .

Labor and Technician Costs

Labor is a major component of splicing costs. Certified fiber optic technicians typically charge \$50–\$150 per hour, with rates increasing for complex or confined-space jobs. Urban or difficult-to-access sites, such as underground vaults, can require additional crew members and safety measures, raising labor costs . Emergency or overtime work may further increase rates to \$120–\$250 per hour .

Equipment Costs

Fusion splicing requires specialized equipment, including:...
