

# How much does a steel cable tray cost in Brazil

## Article Overview

Steel cable trays in Brazil typically cost between \$2 and \$30 per meter, depending on material, type, and finish.

### Price Range and Factors

The cost of steel cable trays in Brazil varies widely based on material, type, size, and surface finish. Standard galvanized steel trays are the most common and generally range from \$10 to \$30 per meter, while stainless steel trays are more expensive due to corrosion resistance and durability. Aluminum trays, though lighter, are pricier, ranging from \$20 to \$50 per meter. Prices can fluctuate depending on raw material costs, particularly steel, which are influenced by global commodity prices and the USD/BRL exchange rate.

### Market Dynamics

Brazil's cable tray market includes both domestic manufacturers and imported products. Domestic producers benefit from shorter lead times and lower transportation costs, while imported trays, often used for high-specification projects in oil, gas, and power generation, may carry higher prices due to tariffs and shipping costs. Specialized trays with higher load ratings, fire resistance, or custom designs command higher margins compared to standard ladder or perforated trays.
