

How much does fire-resistant indoor optical cable cost per meter

Article Overview

Fire-resistant indoor fiber optic cables typically cost between \$0.30 and \$6 per foot (\$1-\$20 per meter), depending on fiber type, strand count, and fire-resistance rating.

Pricing Overview

The cost of fire-resistant indoor optical cables varies widely based on several factors:

- **Cable Type and Fire Rating:** LSZH (Low Smoke Zero Halogen) or LSOH cables, which emit minimal smoke and resist fire, are more expensive than standard PVC flame-retardant cables due to enhanced safety features and compliance with standards like IEC 60331-25 and IEC 60332-2-3 .
- **Fiber Count:** Higher strand counts increase the price. For example, a 12-strand multimode cable may cost around \$0.50 per foot, while a 24-strand cable can reach \$1 per foot or more .
- **Single-Mode vs Multimode:** Single-mode fiber is generally cheaper per meter than multimode fiber, but installation equipment costs may be higher .
- **Indoor Ratings:** Plenum-rated cables, suitable for air-handling spaces, are more expensive than riser-rated cables due to stricter flame and smoke standards .

Estimated Cost per Meter
