

How often is the annual meeting on relay protection held

Article Overview

The Annual Conference for Protective Relay Engineers is held once every year.

The conference is a yearly event that brings together engineers, researchers, and industry professionals specializing in protective relay technology. For example, the 77th conference was held in 2024, the 78th in 2025, and the 80th is scheduled for March 22–25, 2027 at Texas A&M University in College Station, Texas, USA, demonstrating its annual recurrence .

Purpose and Structure

The conference provides a platform for sharing the latest developments in protective relay applications, digital substations, communication technologies, and innovations in power system protection. It typically includes:

- Paper presentations and Q&A sessions covering topics from general protection principles to advanced transmission and distribution protection .
- Pre-conference seminars hosted by major industry players such as Schweitzer Engineering Laboratories, GE Vernova, and SynchroGrid .
- Interactive exhibition halls showcasing the latest products and technologies in protective relaying .
- Networking receptions to facilitate professional connections and knowledge exchange
