

How to connect fiber optic cable to a Xiaomi AIoT router

Article Overview

To connect a Xiaomi router to a fiber optic internet connection, you need to link the fiber cable to an Optical Network Terminal (ONT) and then connect the ONT to your router via Ethernet.

Step 1: Prepare Your Equipment

- Optical Network Terminal (ONT): Most fiber connections require an ONT, provided by your ISP, which converts the optical signal into an electrical signal your router can use .
- Xiaomi Router: Ensure your router supports fiber connections, typically via a WAN or Internet port .
- Fiber Optic Cable: Usually a thin yellow cable with SC/APC or SC/UPC connectors .
- Ethernet Cable: Cat6 or higher is recommended for optimal speeds .

Step 2: Connect the Fiber Cable to the ONT

- Locate the fiber optic wall outlet where the ISP's fiber line enters your home.
- Remove protective caps from both the fiber cable and the ONT port.
- Carefully insert the fiber cable into the ONT's optical input port, aligning the connector properly until it clicks securely .

Step 3: Link the ONT to the Xiaomi Router

- Use an Ethernet cable to connect the ONT's LAN or Ethernet output port to the WAN/Internet port on your Xiaomi router
