

How to use the cable TV fiber optic terminal box

Overview

Extending the fiber through the box makes use of a cable entry gland. Fasten the cable to the clamps or ties to assure the cable is immovable. Remove the cable jacket and buffer coating material so as to. Before you drill holes, strip cables, or set up the splice tray, take 2 minutes to confirm the exact box type you're working with. In many FTTH projects, installers use the term “termination box” and “terminal box” interchangeably. Before. The fiber termination box is an interface between the fiber cable from the line side and the pigtails to be passed to the fiber distribution frame. Whether you're a tech newbie or a seasoned DIY enthusiast, this guide will. A common question we receive is: How do you use a fiber-optic termination box?

We recommend using a termination box if you're ordering an assembly with more than two strands.
