

Huijue Core Switch IP Configuration

Article Overview

To configure the IP address on a Huijue core switch, use the CLI to assign a static IP to the management interface, set the gateway, and enable the interface.

Step-by-Step IP Configuration

- Access the Switch CLI
- Connect via console cable or SSH to the Huijue core switch.
- Log in with super administrator privileges to ensure full configuration access .
- Enter System View
- Execute the command:
system-view
- This switches the CLI into configuration mode where you can modify interfaces and IP settings .
- Select the Management Interface
- Identify the management interface (commonly eth0 or a VLAN interface used for management).
- Enter interface configuration mode:
interface eth0 or for a VLAN interface:
interface Vlan 410
- Assign the IP Address
- Set a static IPv4 address and subnet mask:
ip address
- Example....
