

Installation price of 4-core single-mode fiber optic cable

Article Overview

Installing a 4-core single-mode fiber optic cable typically costs between \$1.50 and \$7.00 per linear foot, depending on installation method, location, and cable features.

Cable Material Costs

The raw cost of a 4-core single-mode fiber optic cable generally ranges from \$0.10 to \$0.50 per foot for the cable itself, with bulk purchases often falling between \$2.00 and \$7.00 per foot for pre-terminated or armored options . Factors affecting cable cost include:

- Construction type: Plenum-rated or armored cables cost more due to fire safety and durability requirements .
- Application: Indoor, outdoor, or direct burial installations influence material selection and price .
- Strand count: A 4-core cable is relatively low in strand count, so material costs are lower than higher-count cables .

Installation Costs

Installation costs vary widely based on method and site conditions:

- Indoor plenum or riser runs: \$0.80 – \$1.70 per foot, including fire-rated pathways and basic termination
