

Medium-sized distribution box size specification table

Article Overview

Medium-sized distribution boxes typically range from 200–328 mm in length, 172–174 mm in width, and 95–140 mm in height, with capacities and features varying by application.

Electrical Distribution Boxes

Medium-sized electrical distribution boxes are low-voltage enclosures that safely distribute incoming power to multiple outgoing circuits through devices like MCBs, RCDs, RCBOs, fuses, isolators, and busbars. They are selected based on application type (residential, commercial, industrial), supply system (single-phase, three-phase, AC/DC), number of outgoing circuits, rated current, and short-circuit capacity. Internal layout considerations include DIN rail space, neutral and earth bars, cable entries, and heat dissipation. Enclosures are typically made of flame-resistant ABS plastic or metal, with IP ratings for dust and water protection, UV resistance, and impact protection .

Typical Dimensions (Plastic Medium Boxes)

- Length: 200–328 mm
- Width: 172–174 mm
- Height: 95–140 mm
- Material: Flame-resistant ABS plastic
- Standards: BS EN60439-3, JB/T7121-93...
