

Mexican optical module price quote

Article Overview

Optical module prices in Mexico vary widely depending on type, data rate, and vendor, ranging from approximately \$50 USD for basic SFP modules to several hundred dollars for high-speed 100G or specialized modules.

Price Ranges by Module Type

- SFP (Small Form-factor Pluggable): Typically used for 1G or 10G links, prices start around \$50–\$100 USD per unit depending on distance and manufacturer specifications .
- SFP+ and XFP Modules: Designed for 10G applications, these modules generally cost \$100–\$300 USD, with higher prices for industrial temperature ranges or extended reach .
- QSFP/QSFP+ and CFP Modules: High-speed 40G–100G modules can range from \$300–\$1,000 USD or more, particularly for long-distance or DWDM/CWDM applications .
- Specialized or Remanufactured Modules: Modules with advanced features, such as digital diagnostics, bidirectional operation, or compliance with specific telecom standards, may carry premium pricing .

Factors Influencing Prices

- Technology and Data Rate: Higher-speed modules (25G, 40G, 100G) require more advanced lasers and photonics, increasing cost .
- Transmission Distance: Modules designed for long-reach (10–120 km) or single-mode fiber are more expensive than short-reach multimode modules .
- Temperature and Industrial Specifications: Industrial-grade modules capable of op...
