

Mongolia specializes in the production of fiber optic cable channels

Article Overview

Mongolia specializes in the installation and deployment of fiber optic cable networks, with major companies providing both domestic and international connectivity solutions.

Key Companies and Capabilities

Moncable Systems LLC is one of Mongolia's leading firms in fiber optic infrastructure, operating since 1996. The company designs and installs optical fiber networks, including aerial, duct, and direct-buried systems, as well as FTTH (fiber-to-the-home) solutions. Moncable has completed over 20,000 km of telecom infrastructure across all 21 provinces, supplying high-quality products from global manufacturers and adhering to Mongolian standards such as MNS 5207:2023 for fiber optic cable installation. Gemnet LLC, established in 2008, operates Mongolia's first national information communication network. It manages a 1,199 km terrestrial fiber optic network along the railway, using advanced DWDM and SDH systems with 99.9% reliability. Gemnet provides international digital channel rental services and connects Mongolia to major Chinese and Russian operators, covering approximately 85% of Mongolia's foreign internet market. New Optic LLC specializes in high-speed DWDM and SDH fiber optic installations, including projects for educational and telecommunication infrastructure. The company has installed over 1,500 km of fiber optic cable and supports hybrid power systems for remote installations.
