

Optical Splitter Product Standards

Overview

Optical splitters and couplers split or combine light—distributing signals injected into a single fiber strand to multiple fibers, enabling point to multi-point communication in Fiber To The Home (FTTH) networks based on ITU. T PON standards such as GPON, XGS-PON and new 25 and 50G standards. The global PLC Fiber Optic Splitter market was valued at \$4. 47 Billion USD in 2020 and is expected to grow at an average rate of 5. A Passive Optical Network (PON) is a fiber optic technology utilizing point-to-multipoint. 1. 1 General This specification covers the standards and requirements for the construction, properties, testing and packing of the Optical Splitter. It provides improved fiber protection, management and maintenance in FTTx. document specifies the requirements for single-mode fiber optic splitters which are a class of couplers that typically h ve one input and multiple (two or more) outputs. Splits are most commonly factors of 2, such as 1x2, 1x4, 1x8, 1x16, 1x32.

What is Fiber Optic Splitter and Types

This post provides a introduction to fiber optic splitters, their types, functions, and several popular Gcabling optical PLC splitters.

Jul 02, 2026

Introduction to Passive Optical Network Splitter Architectures

The configuration below has individual splitters at a central location, but addresses that are typically not reconfigurable by jumpers, so this configuration is a “distributed” split.

WaveSmart Industry Standard Splitter | Clearfield

Clearfield ® 's WaveSmart Industry Standard Splitter is a proven component in Clearfield's line of optical components. The splitter addresses human handling ...

Jul 15, 2026

Ficha_Splitters

Cassette splitter is the most commonly used in the PON networks, and it has the complete protection for inner optical components and cable, as well as the convenient installation and easy to use, but its ...

Mar 24, 2026

Optical Splitters: Split Ratios, Splitting Architectures & PON Network ...

This guide focuses on two critical aspects of optical splitters that define FTTH performance: split ratios (how signals are divided) and splitting architectures (how splitters are ...

Sep 22, 2025

Product Specification Optical PLC Splitter

Each Splitter will be conditioned by unit. The Splitter is maintained in the packaging and the fibers are arranged by respecting the minimum bend radius of 15mm. The packaging protects the Splitter from ...
