

Palau-Chile Bridge

Overview

The Chacao Channel Bridge spans 2.75 km, with two principal spans of 1,155 m and 1,055 m, supported by towers between 157 m and 200 m high. Its 24 m-wide deck will carry four lanes of traffic, replacing a ferry system that currently takes 30 to 45 minutes with a three-minute. The Chacao Channel bridge, also known as Chiloé Bicentennial Bridge, is a bridge currently under construction to link the island of Chiloé with mainland Chile crossing the Chacao Channel. It was one of the several projects that were planned to commemorate Chile's bicentennial in 2010. The. Find local businesses, view maps and get driving directions in Google Maps. 62% complete, according to Public Works Minister Jessica López during an inspection visit to the project. The minister participated in a historic session of the. The largest suspension bridge in Latin America represents the most significant direct investment in the history of the Public Works Ministry. President Gabriel Boric undertook an important tour of Chiloé's main island, where he met the island's mayors.
