

Performance of Home Distribution Boxes in Botswana

Article Overview

Home distribution boxes in Botswana are generally reliable, locally manufactured to ISO 9000 standards, and designed to meet safety and efficiency requirements, though performance depends on adherence to regulatory standards and proper installation.

Local Manufacturing and Quality

Botswana has local manufacturers such as Sharps Electrical, which produce electrical distribution boards, meter boxes, and motor control centers. These products are manufactured under an in-house Quality Assurance System based on ISO 9000 and comply with safety procedures in accordance with NOSA, ensuring high reliability and durability for residential use . The company emphasizes design excellence, customer service, and the use of modern technology, which contributes to the overall performance of home distribution boxes in the country .

Standards and Compliance

The Botswana Bureau of Standards (BOBS) is in the process of adopting international standards such as SANS 780:2021 and IEC TS 60076-20, which cover testing and efficiency requirements for electrical distribution equipment . Compliance with these standards ensures that distribution boxes operate safely, efficiently, and with minimal energy losses. Witness testing is typically conducted for large transformers, but manufacturers may provide certificates for smaller units, which indirectly affects th...
