

Philippines SFP optical module OSFP

Article Overview

CE-certified SFP and OSFP optical modules are available in the Philippines from multiple suppliers, supporting high-speed data transmission up to 800G for data center, telecom, and enterprise networks.

Overview of SFP and OSFP Modules

SFP (Small Form-factor Pluggable) modules are compact, hot-pluggable transceivers used for Gigabit Ethernet, Fibre Channel, and SONET applications. They support various fiber types and distances, including short-range (SR), long-range (LR), and extended-range (ER) configurations, and can convert electrical signals to optical signals for efficient data transmission . OSFP (Octal Small Form-factor Pluggable) modules are designed for ultra-high-speed applications, supporting 800G and 1.6T Ethernet with 200G per lane. They feature low power consumption, hot-pluggable design, LC or MPO ports, and digital diagnostics, making them ideal for modern data centers . Both SFP and OSFP modules comply with international standards such as MSA, IEEE 802.3, RoHS, and CE certification, ensuring safety and interoperability .

Suppliers in the Philippines

Several suppliers provide CE-certified SFP and OSFP modules in the Philippines:

- Philisun offers a wide range of optical transceivers including SFP, SFP+, SFP28, QSFP+, QSFP28, and OSFP modules, supporting data rates from 100M to 800G and transmission distances up to 160 km .
- Volza lists 13 SFP optical transceiver suppliers in the Philippines, including export...
