

Portugal Low-Voltage Distribution Box Model List

Article Overview

Portuguese low-voltage distribution boxes include fixed and withdrawable switchgear models such as MNS, GGD, GCK, GCS, XL, and explosion-proof BXM/BHD/BXP series, designed for industrial, commercial, and residential applications with voltages up to 660V.

Common Models and Series

1. Fixed Low-Voltage Switchgear

- GGD Series: Used in power plants and substations, rated at 380V AC, 50Hz, with high breaking capacity and stable performance. Ideal for industrial energy distribution .
- GDH Series: Similar to GGD, with manufacturer-specific parameters, suitable for stable power supply applications .
- PGL Series: Widely used in locations requiring reliable energy distribution, also fixed low-voltage switchgear .
- 2. Withdrawable Low-Voltage Switchgear
- GCK Series: Composed of a central distribution cabinet and motor control center, rated around 660V AC, 60Hz. Suitable for motor control and lighting systems .
- GCS Series: Rated at 400V AC, 50Hz, used in high-consumption environments like power plants, oil facilities, and high-rise buildings .
- MNS Series: Modular, compact, and technologically advanced withdrawable switchgear, rated below 660V and up to 6300A. Complies with IEC60439, VDE0660, BS EN60439, and NEMA standards. Features include IP31/IP40/IP54 protection, relia...
