

Price List for Low Voltage Cable Management Frames

Article Overview

Custom low-voltage cable management frames typically range from \$150 to \$600 per unit, depending on size, materials, and customization requirements.

Pricing Overview

The cost of custom-made low-voltage cable management frames varies based on several factors:

- **Material and Build Quality:** Frames made from high-grade steel or aluminum with powder-coated finishes are more expensive than basic metal or plastic frames.
- **Size and Capacity:** Larger frames designed to hold more cables or support multiple racks can increase the price.
- **Customization:** Features such as adjustable panels, integrated labeling, cable routing guides, or modular designs add to the cost.
- **Compliance and Certification:** Frames that meet fire, safety, or building code standards may carry a premium. Industry estimates suggest that standard custom frames for commercial network installations generally cost \$150-\$300 for small to medium units and \$400-\$600 for larger, high-capacity or fully customized frames. Additional costs may include shipping, installation, and labeling services.

Installation and Service Considerations

Many NYC-based structured cabling companies, such as ASM Integrators, 4Wires Se...
