

Price list for OSFPS FP optical modules for data center interconnection

Article Overview

OSFP optical modules for DCI typically range from \$1,400 for short-reach 400G modules to over \$130,000 for long-haul coherent ZR+ modules, depending on speed, reach, and vendor.

Pricing Overview

400G OSFP Modules:

- Short-reach SR8 modules for in-rack or cross-row connections are priced between \$1,400 and \$1,800 from reputable third-party vendors, making them the most cost-effective option for standard data center interconnects .
 - DR4 and FR4 modules, suitable for row-to-row or campus links, are moderately priced, with third-party competition driving costs down over recent years .
 - LR4 modules for longer distances can exceed \$10,000 from OEMs, while third-party alternatives may offer significant savings .
- #### 800G OSFP Modules:
- Pricing is still stabilizing due to a relatively consolidated market. Buyers can expect to pay roughly 60-70% of OEM list prices for proven third-party 800G transceivers .
 - OEM modules are preferred for critical workloads due to firmware and DOM compatibility considerations .
- #### Long-Haul Coherent Modules (ZR/ZR+):
- Coherent ZR and ZR+ modules, used for wide-area DCI, are the most expensive, with OEM prices exceeding \$130,000 per module .
 - Third-party alternatives can reduce costs dramatically while maintaining performance for less critical deployments .
- #### Emerging 1.6T OSFP Modules:...
