

Price list for adjustable light attenuators

Article Overview

Adjustable light attenuators typically range from \$20 for basic fiber-optic models to over \$2,000 for high-precision electronic or laser beam attenuators.

Overview of Price Ranges

- **Basic Fiber-Optic Variable Attenuators:** Manual VOAs for singlemode fiber with attenuation ranges of 1–30 dB usually cost \$20–\$150. These are compact, connectorized devices suitable for lab testing, network installation, or system maintenance, offering low insertion loss and manual adjustment via a screw or dial .
- **High-End Electronic or Benchtop VOAs:** Devices with integrated optical power meters, digital displays, and precise control modes (constant attenuation or constant output power) can range from \$500 to over \$2,000, depending on features, wavelength range, and power handling .
- **Laser Beam Attenuators:** Precision prism-based attenuators for high-power laser applications (up to 200 W) are typically more expensive, often \$300–\$1,500, depending on prism material, coatings, and power rating .
- **RF or Acoustic Attenuators:** While not optical, adjustable RF or acoustic attenuators for signal or noise reduction can vary widely, from \$50 for small lab units to several hundred dollars for industrial-grade models .

Factors Affecting Price

- **Attenuation Range:** Wider ranges (e.g., 0–50 dB) or finer step resolution increase cost.
- **Precision and Stability:** Devices with ± 0.1 –0.2 dB accuracy or low insertion loss are more expensive....
