

Price of 144-core optical cable

Article Overview

The price of a 144-core fiber optic cable typically ranges from \$2 to \$15 per meter, depending on fiber type, construction, and additional features.

Price Range and Factors

The 144-core fiber optic cable cost varies widely based on several key factors:

- **Fiber Type:** Single-mode fibers (SMF) are generally more expensive than multi-mode fibers (MMF) due to their ability to transmit data over longer distances with minimal signal loss. Advanced single-mode fibers like G.657A/B, which offer improved bend resistance, are priced higher than standard G.652D fibers .
- **Cable Construction:** Loose tube cables, suitable for outdoor and harsh environments, are typically more expensive than tight-buffered cables used indoors. Armored cables, water-blocking materials, and UV-resistant jackets also increase the cost .
- **Application and Environment:** Cables designed for aerial, underground, or industrial installations with reinforced protection layers cost more than standard indoor cables .
- **Brand and Quality:** Reputable manufacturers like OWIRE provide high-performance cables with rigorous testing, which may have a higher upfront cost but offer better longevity and reliability .

Typical Pricing

- Standard single-mode 144-core cable: \$2-\$6 per meter
- Enhanced or armored cables: \$10-\$15 per meter...
