

Price of Distribution Box Switch Assembly

Article Overview

The price of a distribution box switch assembly typically ranges from \$50 to over \$500 per unit, depending on specifications, capacity, and customization options.

Pricing Overview

The cost of a distribution box switch assembly varies widely based on factors such as voltage rating, amperage capacity, number of circuits, material construction, and integrated safety features. Standard residential units generally start around \$50-\$150, while commercial or industrial-grade assemblies with higher capacity, advanced protection devices, or weather-resistant enclosures can exceed \$500 per unit .

Factors Affecting Price

- **Material and Build Quality:** Premium materials like corrosion-resistant metals or high-grade plastics increase durability and cost .
- **Number of Circuits and Switches:** More circuits or integrated switchgear (MCB, MCCB, RCCB) raise the price .
- **Customization:** OEM branding, modular busbar fitment, and special cable entry modifications can significantly affect pricing .
- **Environmental Rating:** IP-rated or weather-resistant enclosures for outdoor use carry a premium .
- **Technological Features:** Smart monitoring, remote control, or digital displays add to the cost
