

Price of Integrated Power Supply Unit Retrofit

Article Overview

The cost of an Integrated Power Supply Unit (PSU) retrofit typically ranges from a few thousand to tens of thousands of dollars, depending on system size, amperage, and complexity.

Estimated Price Range

For industrial or commercial retrofits, costs vary widely based on the current rating, system type, and installation requirements. For example, automatic transfer switch (ATS) retrofits, which are similar in scope to PSU retrofits, range approximately as follows:

- 100A retrofit kit: \$3,500–\$8,000
- 400A retrofit kit: \$9,000–\$18,000
- 1200A retrofit kit: \$22,000–\$45,000
- 3000A–4000A frames: \$70,000–\$140,000+ These prices include parts, labor, and installation, and reflect the non-linear scaling of material costs with amperage, such as copper bus bars, contact assemblies, and arc-interruption hardware .

Factors Affecting Cost

- Amperage and Power Rating: Higher current ratings significantly increase material costs.
- System Complexity: Integration with existing infrastructure, such as low- or medium-voltage switchgear, may require specialized retrofit kits or modular DC/DC solutions...
