

Price of a Level 2 Distribution Box

Article Overview

A Level 2 distribution box typically costs between CAD 20 and CAD 100, depending on specifications, materials, and features.

Typical Pricing

For a compact 2-level DIN rail distribution box suitable for single-phase setups, prices on platforms like Amazon Canada range around CAD 20-50 for units handling 100-125A with 2 inputs and 12 outputs, brass conductors, and flame-retardant PA nylon housing . These boxes often include a transparent cover for easy inspection and snap-on NS35 rail mounting for quick installation. For larger or industrial-grade Level 2 distribution boxes, especially those with modular designs, IP-rated enclosures, or smart monitoring features, prices can rise to CAD 80-100 or more per unit, depending on amperage, number of circuits, and customization options . Outdoor-rated or weatherproof enclosures generally carry a premium due to corrosion-resistant materials and enhanced safety features.

Factors Affecting Cost

- Amperage and Voltage Rating: Higher current or three-phase systems increase cost.
- Material: Polycarbonate, ABS, or metal enclosures affect durability and price.
- Number of Circuits: More outputs or modular expansion options raise the price.
- Safety Features: Surge protection, arc fault detection, and flame-retardant materials add to cost.
- Installation Type: DIN rail vs. wall-mounted or custom configurations can influence pricing....
