

Price of tools for laying overhead optical cables

Article Overview

The cost of power tools for overhead optical cable installation ranges from a few hundred dollars for basic fiber kits to tens of thousands for hydraulic cable pullers and traction machines.

Hydraulic Cable Pullers and Tensioners

High-performance hydraulic cable pullers, such as the SA-YZ-30A Hydraulic Cable Puller Tensioner, are designed for overhead optical cables like OPGW and ADSS. These units provide precise tension control, automatic rope management, and durable construction for complex terrains. Prices for such industrial-grade hydraulic tensioners typically range from \$15,000 to \$50,000, depending on capacity, features, and supplier specifications (QYPOWER) .

Cable Traction Machines

Economical optical cable traction machines suitable for overhead, buried, or duct installations can handle 4-288 core optical cables and large-section cables. These machines reduce labor requirements and improve efficiency. Depending on the model and power source (electric or diesel), prices generally range from \$5,000 to \$20,000 for standard export-ready units (Hanyu Power) .
