

Price quote for explosion-proof distribution boxes for lighting circuits

Article Overview

Explosion-proof distribution boxes for lighting circuits typically range from \$200 to \$1,500 or more, depending on specifications, certifications, and supplier.

Price Overview

The cost of an explosion-proof distribution box varies based on voltage rating, current capacity, material, and certifications. For example, the BXM (D) series boxes, designed for safe lighting and power distribution in hazardous areas, are available from multiple suppliers with prices starting at a few hundred dollars for basic models and increasing for higher-capacity or customized units .

- Low-end models: Basic aluminum or steel enclosures for small lighting circuits may start around \$200-\$400 .
- Mid-range models: Units with higher current ratings (60-250A), multiple circuits, and IP66 waterproofing typically cost \$500-\$1,000 .
- High-end or customized models: Explosion-proof boxes with advanced features, certifications (IEC 60079, GB/T 3836, ATEX, IECEx), and tailored configurations can exceed \$1,500 .

Factors Affecting Price

- Voltage and Current Rating: Higher voltage or amperage capacity increases cost.
- Material and Construction: Aluminum alloy or stainless steel enclosures are more expensive than standard steel due to durability and corrosion resistance
