

Price quote for household electrical distribution box

Article Overview

Residential electrical distribution boxes typically cost between \$150 and \$1,900, depending on size, amperage, features, and installation requirements.

Typical Cost Ranges

For standard household use, distribution boxes (breaker panels) generally fall within the following ranges:

- Basic indoor panels: \$150-\$450 for parts and installation for smaller single-family homes with 100-125 amp service .
- Mid-range panels: \$450-\$1,500, including higher amp ratings, more breaker spaces, and standard labor .
- Premium or large-capacity panels: Up to \$1,900 or more, often for three-phase systems, outdoor-rated enclosures, or smart monitoring features .

Factors Affecting Price

- Amperage and Number of Circuits: Higher amp ratings and more breaker slots increase cost. Typical residential panels range from 100 to 200 amps with 20-60 circuits .
- Enclosure Material: Plastic, powder-coated steel, or stainless steel enclosures vary in durability and price. Outdoor-rated or weather-resistant boxes carry a premium .
- Internal Components: Panels sold empty are cheaper; adding high-quality breakers, surge protectors, and busbars increases cost .
