

Professional Mesh Cable Tray Prices

Article Overview

A professional wire mesh (basket) cable tray typically costs between \$5 and \$25 per meter, depending on material, coating, and project specifics.

Material and Price Factors

Wire mesh cable trays are generally the most affordable type of metal tray, ideal for lightweight cabling in data centers or office environments. Prices vary based on the material used:

- Pre-Galvanized Steel (PG): Most cost-effective, suitable for dry indoor areas, typically at the lower end of the \$5-\$10 per meter range .
- Hot-Dip Galvanized Steel (HDG): More durable for outdoor or industrial environments, costing more due to thicker corrosion protection .
- Aluminum: Lightweight and corrosion-resistant, often priced higher than steel, around \$15-\$25 per meter .
- Stainless Steel: Highest cost, used in hygienic or highly corrosive environments, exceeding \$25 per meter in some cases .

Installation and Total Project Costs

The material cost is only part of the total expense. Installation factors can significantly affect the overall budget:

- Labor: Skilled workers are required for cutting, bending, and securing trays, with costs rising for elevated or complex routing
