

South Asia Export Base Station Energy Solution 400V CIF Price

Article Overview

400V lithium-ion and sodium-ion energy storage solutions for telecom base stations in South Asia are available with indicative CIF prices starting around US\$0.12/W, depending on capacity, chemistry, and supplier.

Battery Types and Capacities

Lithium-Ion / LiFePO4 Systems:

- Available in 100kWh to 5000kWh capacities with 400V–800V configurations .
- High energy density, long cycle life, and safety features make them suitable for macro and small cell base stations .
- Example: 120–125kWh 400V LiFePO4 packs for industrial telecom UPS and backup systems, with modular designs for scalability .
- Sodium-Ion Batteries:
 - Emerging technology optimized for telecom backup, particularly in South Asia, China, and Southeast Asia .
 - Advantages include lower raw material costs (30–40% below LiFePO4), high thermal stability (–30°C to +60°C), and long cycle life (>4000 cycles), .
 - Ideal for off-grid or solar-integrated base stations, supporting 72+ hours of autonomous operation .

CIF Pricing Overview

- Indicative CIF price for LiFePO4 systems: ~US\$0.12 per Watt for sample or small-scale orders .
- Sodium-ion systems are generally 30–40% cheaper than LiFePO4, making them cost-effective for large-scale deployments in South Asia .
- Final CIF pricing depends on battery capacity, shipping volume, insurance, and port of entry. Suppliers like Hefeng Energy, Mica Power, and SINEE offer export-ready solutions with logistics support to South Asia .

Supplier Capabilities

- Hefeng Energy: Offers 400V–800V LiFePO4 systems, OEM/ODM support, and sample orders .
- Mica Power: Provides high-voltage 400V packs, full industrial chain integration, and global export experience including South Asia
