

South Korea fiber optic cable connection

Article Overview

South Korea has a highly advanced fiber optic network, driven by 5G deployment, FTTH expansion, and robust digital infrastructure, with the market projected to grow steadily through 2035.

Market Overview

South Korea's fiber optic cable market is estimated at \$1.8–2.2 billion in 2026, with a projected CAGR of 8–11% through 2035 . Growth is fueled by nationwide 5G and 6G infrastructure upgrades, hyperscale data center expansion, and increasing demand for high-speed broadband. The market encompasses optical fiber, cables, connectors, patch cords, transceivers, passive components, and enclosures used across telecom, data center, and enterprise networks .

Key Applications

- Telecommunications: Over 60% of demand comes from telecom networks, including long-haul, metro, and access networks .
- FTTH (Fiber-to-the-Home): Urban FTTH penetration exceeds 85%, with ongoing expansion into suburban and rural areas under government-subsidized programs .
- Data Centers: Interconnects and cloud infrastructure account for 35–40% of market value, with 400G and 800G transceiver deployments accelerating from 2027 .
- Enterprise Networks: Increasing adoption of fiber for internal connectivity, AI/ML workloads, and industrial IoT applications .
