

Suriname Secondary Distribution Box Specifications

Article Overview

Secondary Distribution Boxes (SDBs) in Suriname typically feature modular designs, capacities up to 63A, IP40 protection, and are suitable for wall-mounted or under-floor installations.

General Description

A Secondary Distribution Box (SDB) is a device that receives power from a Main Power Distribution Box and distributes it to branch circuits, often through snap-on extender cables or pre-wired modular connections . SDBs are essential for secondary distribution in industrial, commercial, and institutional facilities, providing a centralized point for electrical distribution and telecommunication systems .

Key Specifications

- Capacity: Common SDBs support up to 63A, with options for 2 to 36 modules, allowing flexibility for different load requirements .
- Construction: Typically made with powder-coated steel or durable finishes, some models feature glass panels for visibility and aesthetics .
- Protection Rating: Many SDBs have an IP40 rating, providing protection against solid objects larger than 1 mm while being suitable for indoor environments .
- Terminal Blocks: SDBs can be fitted with terminal blocks for custom wiring, enabling easy integration with existing electrical systems .
- Modular Design: Modular and pre-wired options allow for plug-and-play installatio...
