

Telecommunications Fiber Optic Cable Laying Fee Standards

Overview

Buyers typically pay for fiber laying by combining material costs, labor time, and permitting plus trenching or aerial support fees. The Fiber Optic Association, Inc. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. The main cost drivers are trench depth, fiber count and type (single-mode vs multi-mode), conduit requirements, and local permitting rules. They define a minimum baseline of quality and workmanship for installing electrical products and systems. NEIS® are intended to be referenced in contract documents for electrical construction or liability to users of this publication. FO-VC2 JOINT USE - VERTICAL MIDSPAN CLEARANCES 48. APPENDIX A - COVER SHEET / TOC 52.
