

Two SC fiber optic panels

Article Overview

SC fiber optic panels provide organized connectivity for backbone or horizontal cabling, supporting splicing, patching, and splitter integration.

Overview

SC fiber optic panels are designed to manage and terminate optical fibers efficiently. They can be rack-mounted in 19-inch or metric cabinets or wall-mounted for compact installations in residential, commercial, or data center environments . These panels typically come pre-loaded with SC adapters (Simplex or Duplex, UPC or APC) and may include pigtails for splicing or splitters for signal distribution .

Types of SC Fiber Panels

- Rack-Mount SC Panels
 - Designed for 19-inch or metric racks.
 - Can include 1:2 splitters or modular adapter packs.
 - Suitable for backbone-to-backbone or backbone-to-horizontal connections.
 - Often used in data centers and enterprise networks for high-density fiber management .
- Wall-Mount SC Panels
 - Compact, indoor panels for residential or commercial buildings.
 - Typically include 2 SC/UPC or SC/APC ports with pre-installed pigtails ready for splicing.
 - Ideal for locations with limited space or for end-term fiber terminations
