

Upgraded version of Egypt integrated wiring cabinet

Article Overview

Modern integrated wiring cabinets in Egypt offer modular, high-protection, and versatile solutions for residential, commercial, and industrial applications.

Legrand Cabinets

Legrand provides a wide range of modular distribution cabinets suitable for residential and small commercial buildings. The XL³ range offers fully extendable cabinets with capacities of 24 to 36 modules per row, heights from 1050 to 1950 mm, and supports assemblies up to 800 A. These cabinets feature IP 65 and IK 09 protection, weatherproofing, and compatibility with cable sleeves for additional functions. The Practibox³ and Plexo³ lines provide flush-mounted options, reversible chassis, tool-free rail installation, and multiple module configurations from 4 to 72 modules, ensuring flexibility and ease of wiring .

Rittal Enclosures

Rittal offers wall-mounted and floor-standing enclosures made from sheet steel or fiberglass-reinforced polycarbonate. These cabinets provide IP 55 to IP 66 protection, quick-release covers, self-extinguishing materials, and flexible cable entry options. The TS 8 baying system allows modular assembly with partial doors and internal separation, while stainless steel versions (AISI 304/316L) are suitable for corrosive or outdoor environments. These enclosures are designed for fast installation, secure latching, and compatibility with standard mounting grids
