

Upgraded version of the power distribution system for network cabinets in the park

Article Overview

Modern upgraded power distribution systems for network cabinets combine modular design, smart control, and sustainable materials to ensure reliable, scalable, and safe electricity supply in outdoor environments.

Modular Low-Voltage Distribution

The Kabeldon low-voltage distribution system by ABB is designed for outdoor public environments, offering modularity, clear markings, and unobstructed visibility for fast and flexible installation. It ensures safety with full IP2X classification and supports continuous operation over its lifetime. The upgraded Kabeldon NXT version reduces carbon footprint by 29% using recycled steel and renewable energy, making it both reliable and environmentally sustainable .

Industrial Park-Scale Distribution

For larger park installations, Ansind Electric provides integrated power distribution solutions suitable for multiple zones within industrial or network parks. Their approach includes a central park distribution system with zoned networks, ensuring stable power supply, scalability, and efficient electricity management. Core equipment includes switchgear, transformers, and custom electrical systems designed for high reliability and flexibility .
